A Balanced Competency based board

As a sub committee of Mountaineering Ireland, the Mountain Training Board Ireland will adopt the contemporary practice of a competency based board. This differs from the traditional representative based training board structure, which facilitates reliable and fair decision making and board performance through the employment of individuals with a range of professional and sporting skills relevant to the needs of today's mountain training boards. People possessing these skills and who are experienced and understand mountain training within the mountaineering context are considered critical. In the board, these skills must be complemented by independent thinking and a collective responsibility in the best interests of mountain training and skills development for all. The board should consist of a balance of skills and competencies demonstrated by individual board members. (Guidance from Sport Ireland "Better Boards Stronger Sports" Toolkit.)
